

01

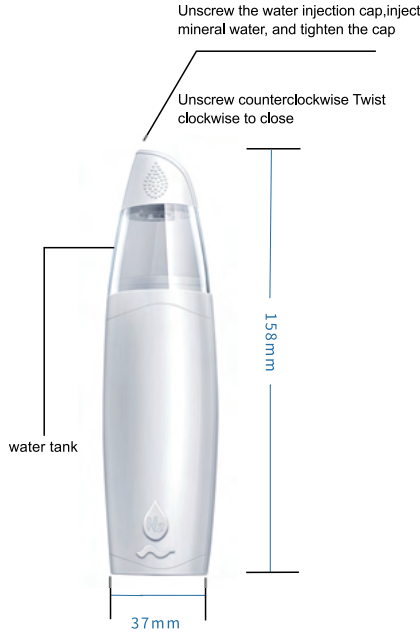

【Instructions】

- Before first use, fully charge the product. Insert the USB plug on the Type-c end into the charging port at the bottom of the product, and insert the USB plug in to the charging device.
- Charging takes 1-2 hours to fully charge, the blue light turns on when working, the purple light turns on when charging, and the green light does not flash when fully charged.
- Unscrew the head water tank cover counterclockwise, fill in mineral water, and close the water tank cover.
- Push the side sliding switch downward to turn on the spray. In the working state, the blue light is on, the electrolytic hydrogen production is started at the same time, and small blisters can be observed in the water tank.
- Push the side slide switch upward and the sprayer stops working.
- In order to prevent accidentally opening this product, it is forced to shut down every 70 seconds, and the green light flashes at 68 seconds. This machine is equipped with 1200MAH polymer imported batteries.
- Please clean the product with a paper towel or clean towel after use.
- Please keep the product in a safe, dry location.
- When using, please aim the spray nozzle at the face or eyes that need to be sprayed.

Note: when spraying, the device cannot be tilted more than 45 degrees or turned upside down to avoid water leakage or damage to the electrodes.

【Precautions】

- It is recommended to use mineral water, purified water or distilled water which can cause slightly larger water spots. Do not use tap water or other liquids, and do not add toner or other cosmetics to the product.
- If the product will not be used for a long time, please dispose of the remaining water and dry the product. When using it again, please fill it with mineral water and soak it for two hours.
- Do not block the sprayer nozzle during use.
- Due to the magnetic induction of this product's switch, please do not place this product close to strong magnets.
- Do not immerse product in water for cleaning or other purposes.
- If you experience any skin reaction (itching or pain) after use, please stop using this product and consult your doctor.
- The product's battery is not replaceable.
- Keep the product and USB cable dry.
- To charge the product, please use the charging cable provided with the product.
- Please use a USB charging head below 2A for charging power.
- Do not insert any material into the USB charging jack to avoid short circuiting.
- If the spray head is clogged, use a cotton swab dipped in alcohol to gently wipe the spray nozzle.
- It is strictly forbidden to turn on the machine when there is water shortage.

【Abnormal phenomena and troubleshooting】

Anomalies:

1.The product cannot be charged

- Make sure you connect the product or the Type-c and to the USB port that is powered on.
- When charging again after the battery is exhausted, you need to wait for one minute before starting charging.
- If the charging indicator light on the product still cannot light up, please check whether the power supply is normal. If you cannot solve the problem, please contact the after-sales service center.

2.The product does not fog up

- Check if the product has electricity.
- Ensure the use of mineral water and ensure that there is no shortage of water in the water tank.
- It is prohibited to use other types of liquids to fill the sprayer water tank, as the spray nozzle may easily become clogged.
- You can use a cotton swab dipped in alcohol to gently wipe the spray port.

3.The product does not work

- Make sure the slide lock slides into place.
- Charge the product according to the instructions in the user manual.
- The product cannot be used while charging, please remove the USB charging cable.

【Warranty instructions】

- This sprayer is guaranteed to be replaced within one month due to quality problems (the appearance does not affect secondary sales) and is guaranteed within 1 year (excluding gifts and accessories. If there is a problem with the gifts or accessories, they can be replaced accordingly. Gifts and accessories are fragile. Accessories have a 3-month warranty).
- Due to functional quality issues, the product will be covered by the factory at no cost during the warranty period (including round-trip postage). Postage and maintenance fees due to man-made damage will be borne by the consumer.
- If the product has no functional quality issues, returns or exchanges will not be accepted after seven days.
- Please pack and package the items yourself when returning or exchanging items to avoid damage during express transportation.
- The warranty card should be kept in a safe place. If lost, the company will not reissue it.
